**NEW REGULATIONS ADOPTED BY THE ALASKA BOARD OF FISHERIES:**

During the Board of Fisheries (BOF) meeting held in Ketchikan from February 24–March 4, new regulations were adopted that relate to the 2012 spring troll fisheries. *These new regulations are not expected to take effect until late June.*

**CODED-WIRE-TAGGED FISH**

The heads of all adipose fin-clipped salmon must remain attached to the fish until the fish are sold [5 AAC 29.140 (b)]. Permit holders who freeze their catch onboard are asked to contact the department prior to fishing so that sampling and fish ticket issues can be discussed. An Exemption Permit is required to allow the removal of heads from Chinook salmon harvested in the spring areas prior to delivery.

**CATCH REPORTING**

**It is extremely important to keep fish caught in different fishery areas separated so that accurate dockside sampling can occur by department personnel.** In order to maximize the harvest of Alaska hatchery-produced Chinook salmon in the spring fisheries, catches must be reported accurately. If more than one area or fishery is fished, or fish are kept for more than one period, each troller and tender is required to keep and report these catches separately on separate fish tickets (5AAC 29.130). The fishery name and the

fishery area number must be reported on all fish tickets, as well as dates that the fishing trip started and ended. All fish legally retained in the commercial salmon troll fishery, whether for sale or retained for **personal use** (condition code 95) **must be recorded on a fish ticket**. Coho salmon may not be retained until June 15, unless an earlier date is announced in a future news release. That date is one of several pending regulation changes adopted at the 2012 Board of Fisheries meeting.
